PORTABLE CHEMICAL ATOMIZER & APPLICATOR

Portable Precision Fogger by Lafferty

Product Description

The Portable Precision Fogger is a chemical atomizer that uses compressed air to draw pre-diluted chemical solution from a pail on the stainless steel cart. The chemical solution flows through the twin-line hose and thumb-gun to the fogger body which atomizes the chemical and projects it as small to medium size "damp" particles at distances up to 15 feet. This unit features an on-board 120V air compressor and requires only an electrical connection. Used for disinfection, sanitizing, insecticide application, odor control, humidification and many other applications.

Key Features

- Self-contained, portable system
- Atomizes chemical solutions using compressed air
- Very quiet, 120V air compressor
- Venturi action draws pre-diluted chemicals
- Projects small to medium size "damp" particles up to 15'
- Fog (mist) fills the air and saturates exposed surfaces, including hard-to-reach areas
- Precision metering tips can refine the particle size (wetness) by reducing chemical usage
- Stainless steel construction ensures durability and years of outstanding performance

INCLUDES

- Stainless steel, 4 wheel cart assembly with hose rack
- Non-marking tires with stainless steel swivel casters
- 120V air compressor
- 25' twin-line air/chemical hose with activation ball valves
- Machined stainless steel Precision fogger body
- Stainless steel metering tip holder
- 10 color-coded metering tips

Works best with:

OPTIONS

- 5 Gallon Pail - 5 Gallon Round W/ Suction Stem
- Square Jug Rack Conversion
- Proportioning / Filling Options
- 1-Way Ball Valve Mixing Station (4 GPM)
- Hose Length Upgrade (Specify at Time of Order)
