SIMPLICITY FOGGER

2-Way Tank Fogger With Stainless Steel Cap

Product Description

The 2-Way Tank Fogger With 3" Stainless Steel Cap is a chemical atomizer that uses compressed air (14.8 CFM @ 80 PSI) and venturi action to draw ready-to-use chemical solution. This all stainless steel unit will atomize the solution and project it as light, "damp" fog particles in 2 directions up to 25 feet. This unit features a threaded 3" stainless steel cap and is used for sanitizing or cleaning tanker trucks and other large vessels.

Key Features

Atomizes chemical solutions using compressed air.
Projects light, "damp" fog particles at distances up to 25' in opposite directions.
Attaches to 3" diameter ports on tanker trucks and large tanks.
Venturi action draws pre-diluted chemicals.
Optional precision metering tips allow the user to refine the particle size.
All stainless steel construction ensures durability and years of outstanding performance.

INCLUDES

- Stainless steel air inlet ball valve
- Stainless steel threaded 3" pipe cap
- Machined stainless steel fogger body
- Stainless steel extensions
- Stainless steel metering tip holders
- 20' chemical suction tube and strainer

APPLICATIONS

- Tanker Truck Internal Cleaning
- Passivation
- Odor Control
- Any Internal Tank Cleaning

Works best with:

Stainless Steel
Passivation
Solution

Odor-Encapsulating
Deodorizer

Resin Stripper
Low VOC
FP > 200°F

Also available with Polypropylene Fogger Head for use with mineral acids, such as HCL and HF
