

# FOAM-X

10% Silicone Emulsion Defoamer

## Product Description

**FOAM-X** is a water dilutable, concentrated industrial strength silicone emulsion designed to control foam in a wide variety of applications. FOAM-X works effectively in very low concentrations, even in extreme pH conditions. Contains a preservative to guard against microbial growth.

## Uses & Directions

FOAM-X is great for Refineries, Chemical Plants, Resin Manufacturing, Textiles, Agrochemicals, Printing Fountain Solutions, Tank Wash Operations, Disposal Plants, Municipalities, Treatment Tanks, and Sewage Treatment Plants to kill unwanted or nuisance foam quickly, efficiently, and permanently. For process applications, the operator must determine the concentration of FOAM-X based on the need at the time it is to be dispensed. One to 100 parts of active silicone per million parts foamer are sufficient to eliminate most foams.

In carpet extractors, steam cleaners, and automatic floor scrubbers, use 1 oz. per 10 gallons of expected recovery water. Begin by pre-diluting the Foam-X into a quart of water, and place it in the recovery tank.

## Health Hazard Summary

Causes irritation to eyes. Prolonged exposure may irritate skin. May cause gastrointestinal discomfort, including nausea, vomiting, diarrhea, etc if ingested.

## Specifications

Appearance ..	Milky white, viscous liquid
Odor .....	None
Specific Gravity .....	.98
pH .....	7-8
Percent Active .....	10 %
Emulsifier Type .....	Nonionic
Flammability .....	Non-flammable
Dilution with effluent.....	> 1000 to 1
Evaporation rate .....	Very low
VOC's .....	None
Solubility in water .....	Complete
Biodegradable .....	Yes
Storage Stability .....	Excellent*
USDA Registered? .....	Yes

\* 1 year

Exempt from tolerance at 40 CFR 180.1001 (d) for pesticide formulations - applied to growing crops only

## Package & Handling

275 gallon tote	JCRE24854
55 gallon drum	JCRE4410
