

GAMMA NEBULA-421

Tank Wash Deodorizer

Product Description

GAMMA NEBULA-421 is an extreme-duty deodorizer and odor neutralizer. It works to encapsulate industrial malodors from the air and leave a fresh, clean fragrance. This product may be added to virtually any cleaning solution to add deodorizing power to it.

In tank wash applications where a variety of obnoxious odors abound, GAMMA NEBULA is without peer. Use for neutralizing mercaptans, acrylates, fish oils, etc.

Uses & Directions

Tank Cleaning: Best Method: Mix one gallon of hot water with one gallon of GAMMA NEBULA-421. Apply via **John-Henry Simplicity Fogger**.

Alternate Method: Mix one pint or more with an equal amount of water (depending on nature of residue), and pour into tank via dome lid. Apply live steam for 1/2 hour.

Note: This product will not neutralize heels. If a large amount of heel is present, much more product will need to be introduced into tank. While not cost effective, this method will neutralize the heel. Trial and error will be the only way to determine the amounts needed.

Health Hazard Summary

Causes irritation to eyes. Prolonged exposure may irritate skin. Mists or sprays may irritate eyes, nose, and throat.

Specifications

Appearance	Clear, water white liquid
Odor	Gammalene fragrance
pH.....	7 ± .5
Specific gravity	1.0
Solubility in water.....	Complete
Biodegradable surfactants.....	Yes
Hard water tolerance	Excellent
Phosphate	None
Butyl Cellosolve	None
Flash point.....	None
Storage Stability.....	Excellent*

* 1 year

Use Dilutions:

Fogging: Simplicity Fogger: . 1Gal to 1 Gal. hot water
 Steaming: Through Dome Lid.... 1 Pint to 1 pint water
 Steaming: Through Steam-Jet... 1 Pint to 1 pint water
 Wiping/Mopping/Padding Up to 64:1 with water
