

GAMMA SPRAY

Extreme Duty Deodorizer

Product Description

GAMMA SPRAY is a multi-purpose air freshener, deodorizer and defilmer for all washable surfaces. It works to eliminate stale odors from the air and leave a fresh, clean fragrance in treated areas. This product may be added to mop water to remove soap film from floors, walls and other washable surfaces. In industrial applications where it is desirable to deodorize without leaving an identifiable fragrance, GAMMA SPRAY is without peer.

Uses & Directions

Tank Cleaning: Best Method: Mix one gallon of hot water with one gallon of GAMMA SPRAY. Apply via **John-Henry Simplicity Fogger**. **Alternate Method:** Mix one pint or more with an equal amount of water (depending on nature of residue), and pour into tank via dome lid. Apply live steam for 1/2 hour.
Kitchens: Spray garbage cans, cupboards, refrigerators and storage areas to eliminate foul odors. Add 4 ounces per gallon of water for mopping and washing of hard surfaces.

Note: This product will not neutralize heels. If a large amount of heel is present, much more product will need to be introduced into tank. While not cost effective, this method will neutralize the heel. Trial and error will be the only way to determine the amounts needed.

Health Hazard Summary

Causes irritation to eyes. Prolonged exposure may irritate skin. Mists or sprays may irritate eyes, nose, and throat.

Specifications

Appearance Clear, water white liquid
Odor Gammalene fragrance
pH 7 ± .5
Specific gravity 1.01
Solubility in water Complete
Use Dilution Up to 64:1 with water
Biodegradable surfactants Yes
Hard water tolerance Excellent
Phosphate None
Butyl Cellosolve None
Flash point None
Storage Stability Excellent*

* 1 year

Package & Handling
