

TC-202

Hot Vat Resin Emulsifier

Product Description

TC-202, Concentrated Resin Emulsifier, is a built surfactant system that is the perfect product for general tank cleaning. The product eliminates the need for pre-solving and is especially effective for removing fresh latex and resins, fatty acids and oils, and lube oils.

The proprietary surfactant system defoams when used at temperatures above 140° F, rinses off freely leaving no film, and is completely biodegradable.

Uses & Directions

TC-202 may be used in all tank cleaning operations and is particularly suited for use in re-circulating hot vat systems.

Begin with an 6:1 concentration with water. Assuming success at this ratio, try 8:1 and 10:1 until performance is deminished. Then add more concentrate. Document actual dilution ratio for future reference.

Health Hazard Summary

Can cause severe irritation and burns to skin. Can cause severe irritation, burns, and damage to eyes. Mists and vapors can cause irritation to eyes, nose, throat, and respiratory tract. Ingestion can damage mouth, throat, and other tissues and may be fatal. Vapors can cause nausea, dizziness, nausea, stupor, vomiting, headache, and/or irritation to nose, throat, and respiratory system.

Specifications

Appearance	Clear, Red liquid concentrate
pH	13.0 ± .5
Specific Gravity	1.07
Flashpoint	>200 F
Use Dilution	Up to 10:1 with water
Foam	None above 145° F
Hardwater Tolerance	Excellent
Detergency	Excellent
Resin Removal	Excellent
Storage Stability	Excellent*
Freeze-Thaw Stability	Will freeze**

*1 year under normal conditions

** Usable after thawing with no change in performance. Agitate after thawing.

Package & Handling

275 gallon tote	JBC24974
55 gallon drum	JBC8016
